

Connect to an API

How to connect to an API in power BI

1. Open the Power BI Desktop and click on the **"Get Data"** button and select the **"Web "** option as shown in the below Screenshot.

2. Click on the **"Advanced Button"**

3. You must enter the **"URL"** of API and **"Smart Token"** which returns the data you want to fetch and Click **"OK"**
