

How To's, Useful Links, Best Practices & Recommendations

Title	URL	Notes
Snowflake Best Practices	<a +site%3adocs.snowflake.com"="" href="https://www.google.com/search?q=as+a+best+practice">https://www.google.com/search?q=as+a+best+practice"+site%3Adocs.snowflake.com	Returns results from snowflake documentation for the phrase "as a best practice".
Snowflake Recommendation	<a +site%3adocs.snowflake.com"="" href="https://www.google.com/search?q=Snowflake+recommends">https://www.google.com/search?q=Snowflake+recommends"+site%3Adocs.snowflake.com	Returns results from snowflake documentation for the phrase "Snowflake recommends"
Snowflake Cost Management	littleK0i/SnowKill: Realtime monitoring of running, queued and blocked queries in Snowflake (github.com)	<p>SnowKill is a near real-time query monitoring tool for Snowflake</p> <p>SnowKill helps to detect potential problems with queries which are currently running. It analyzes query stats and plans, detects bad patterns, generates notifications and optionally "kills" some queries automatically.</p>
