dbt useful Resources

Welcome to the DBT Resources Wiki page! This is a collaborative space designed for our team to share, explore, and discuss valuable resources related to dbt (data build tool). Whether you've come across an insightful article, an engaging blog post, an in-depth document, or an enlightening video, we encourage you to share it with the team here.

Purpose: This page aims to:

- Facilitate knowledge sharing among team members.
- Initiate conversations around new dbt processes, methods, and features.
- Help team members stay updated with the latest best practices and trends in the world of dbt.

Guidelines for Posting:

1. **Relevance**: Ensure that the resource is relevant to dbt and would be beneficial to the team.
2. **Credibility**: Only share resources from credible and trustworthy sources.
3. **Description**: When sharing a link, please provide a brief description of the content and why you found it useful.

Resource List:

- Overcoming complexity: the biggest new dbt Cloud features from Coalesce 2023
  Talk about dbt Mesh, dbt Explorer, dbt Semantic Layer, smarter CI/CD and more.

- Implementing your mesh plan
  Best practices and examples using single repo and simple models

- Best-Practices-for-Optimizing-Your-dbt-and-Snowflake-Deployment.pdf
  Automated resource optimization for dbt query tuning, Resource management and monitoring, Writing effective SQL statements …

Comment Section:

Feel free to use the comment section below to discuss the shared resources, ask questions, or provide feedback on how we can improve this wiki page. Let's work together to make this a dynamic and valuable space for our team!
